Overview

A web app where users can play chess and follow other users, watch their matches, etc. We will be using Lichess API for that.

Features

- Login & Register with google authentication
- Create a new game, invite friend and play chess online
- Create a user profile and add personal information, game stats, etc.
- Search and follow other users and play chess together
- Check game stats including number of wins, losses, etc.
- Learn chess from curated chapters
- Send messages to other users
- Broadcast messages which will be visible to all logged in users
- Analyze games after the game has finished
- Create, accept and decline challenges
